PROVEN TRACK RECORD

“We have provided waterproofing solutions to high profile clients for more than 30 years. Our dedication to quality has earned WDC a reputation for exceptional results.”

—George Kohut, Owner

Experience, knowledge, enthusiasm, attention to detail. These are just a few descriptions clients have used in reference to the quality of work delivered by the experts at Weatherproofing Design Consultants.

WDC specializes in all phases of commercial construction consultation as it relates to minimizing moisture intrusion into the building envelope. When it comes to important matters like these, there's security in knowing you're hiring someone who has been there and done that. With more than 30 years in the industry, it's no wonder WDC's owner is one of *only five* instructors in the United States certified to teach Continuing Education Courses to architects for commercial waterproofing.

WDC completed all above and below grade waterproofing for the Marvin Braude Constituent Service Center in Van Nuys.

Quality Matters

The experts at WDC put their experience to work for you. You can count on being provided with complete specifications, along with all pertinent back-up data and materials necessary for completion. Proposed materials are selected with special attention given to all Material Safety Data Sheet information and ASTM codes.

WDC's high standards are evident when materials are chosen — always safe and non-toxic, selected with consideration for permanence and design.

All specifications are written with equal materials, providing the consultants, architects and owners ample and thorough review before selection is made.

Final decisions as to color, texture and specifications

will be jointly made by the architect, owner and consultant, agreed to in writing by all parties.

Making it Count

WDC understands that quality counts in your new building or retrofit waterproofing project. That's why each phase is closely monitored from inception to completion. WDC provides daily reports to the architect and general contractor, and maintains copies of all reports at the consultant's office.

Any disagreements or changes are given priority attention, and all subsequent decisions are noted in writing, agreed to by all parties and considered final.

There will be at least two qualified bidders on all phases of your project, unless you choose to proceed with a specific source who performed successfully in the past.

Upon completion of the project, a final inspection will be conducted by all parties. At that time, you will be presented with a complete diary of the project workflow and warranties for both labor and materials.

Experience the Difference

Enjoy peace of mind when you put your waterproofing needs into the hands of a company with a proven track record. *When experience counts, you can count on Weatherproofing Design Consultants.* Give the experts at WDC a call today!

Twenty million dollars worth of roofs, exterior walls and below grade waterproofing went into Pepperdine University's Malibu campus.

Areas of Specialization

- All types of roofing
- Exterior curtain walls and windows
- All below-grade water intrusion and penetration conditions
- Setting rooftop air/handlers
- All exterior pedestrian walking decks (accommodating all materials)
- Sealing external ornaments
- Proper installation of non-skid walkways
- Proper installation of below-grade parking structure capabilities

“I highly recommend WDC for any role in the restoration or corrective actions of facility work. They are reliable, honest and conscientious consultants with many years of experience and knowledge.” —Art LaValle, Pepperdine University

“Because of WDC's experience and integrity, we have come to value their opinion in construction matters that extend beyond the specifications, construction details and contractor performance evaluation services we initially called upon them to provide.” —Larry Rasmussen, Rasmussen & Associates

“We have been pleased with WDC's resourcefulness during the design. We plan to continue using WDC in the future for projects requiring additional specialized expertise.” —John Pareza, Ware Malcomb

“Consistently dependable, efficient and resourceful... willing to assume additional responsibility beyond the basic requirements.” —Stan Mantooh, Ventura County Superintendent of Schools
